*Figures based on average transaction values - may vary depending on actual volume of gold handled per transaction.

welcome to gold buying centres

Gold Buying Centres are part of a long established group of companies which were formed in the late 90's to help provide liquidity to people who need instant cash.

Our trading philosophy ensures that each of our customers receive a service which is unrivalled.

We are here to help provide our customers with quick cash with the minimum of fuss and we do exactly that!

Throughout our many years experience within the gold business we have witnessed many different types of trading environments but none have been as beneficial to our customers as the current climate. With gold prices reaching an all time high and the current financial climate biting hard there seems little point in keeping unwanted items of gold in the drawers when these could be used to realise significant amounts of cash!

Gold Buying Centres purchase unwanted items of gold. We are able to buy gold "over the counter" from one of our agencies or alternatively we can purchase gold through the on line system which allows our customers to post their unwanted jewellery to us and receive payment for the items by return.

Becoming a gold buying centres agent will seriously increase your profit margins and could well also improve profits generated through your core business. Targeted and focussed marketing campaigns carried out at the expense of GBC may also help to raise your overall business profile.

With all the above in mind, this genuine opportunity deserves serious consideration!!

here's what some of our existing agents have to say

“ GBC approached us to become agents in October 08, since then we have seen our business go from strength to strength with another profit centre added for absolutely no extra cost it has proved to be a positive move for our us” ”
Gina at Xtra Finance Hull

“ Wow!! We've been amazed at the amount of gold people actually have stored away in drawers and old jewellery boxes! It really is surprising how much money we are able to pay our clients for what appears to be a load of scrap metal. Our existing customers love the new service and it has also brought "new blood" in to the branch which allows us to sell our other services to the client.. Thank you GBC. *Sarah ABC Hull* ”
